RE: Notice of QF Self Certification for Orangeburg Solar

Dear Ms. Boyd,

Eagle Solar Group is developing a Qualifying Facility and seeking a power purchase agreement with South Carolina Electric and Gas Company under avoided cost pricing at the current PR-2 rate. Our Orangeburg Solar project is a “qualifying small power production facility” under PURPA because it will use solar irradiation as its primary fuel source and it is smaller than 80 MWac.

Eagle Solar Group filed for self-certification as a Qualifying Facility, and FERC requires that we provide notification to the state regulatory authority.

A copy of our FERC Form 556 is attached to this email.

Please distribute this information as required, and please contact me with any questions.

Sincerely,

Christopher S. Kellar
Eagle Solar Group
